
List of Tables

Table 1 :	Energy efficiency potentials of the steel sector from various studies.	Page 28
Table 2 :	Energy saving potentials in European industry (percentages compared to 1999)	Page 30
Table 3 :	Energy saving potentials in Japanese industry (percentages compared to 1999)	Page 30
Table 4 :	Final energy demand of Japanese industry (1999)	Page 31
Table 5 :	Final energy demand of Japanese Industry, <i>ERJ Demand Model</i>	Page 31
Table 6 :	Specific energy demand in the Japanese residential sector (1999)	Page 33
Table 7 :	Total energy demand in the Japanese residential sector (1999)	Page 34
Table 8 :	Energy saving potentials in the Japanese residential sector in % compared to 1999.	Page 34
Table 9 :	Final energy demand of the residential sector, <i>ERJ Demand Model</i>	Page 35
Table 10 :	Specific energy consumption in the Japanese commercial and service sectors (1999)	Page 37
Table 11 :	Total energy consumption of the Japanese commercial and service sectors (1999)	Page 37
Table 12 :	Energy saving potentials in the Japanese commercial and service sectors in % compared to 1999	Page 38
Table 13 :	Final energy demand of the commercial and service sectors, <i>ERJ Demand Model</i>	Page 39
Table 14 :	Status of passenger and freight transport in Japan (1999)	Page 41
Table 15 :	The final energy demand 1999 and in the <i>ERJ Demand Model</i>	Page 44

Table 16 :	Regional area in the residential sector that is suitable for the installation of solar cells and solar collectors (five percent of the dwelling area)	Page 54
Table 17 :	Overview of the electrical supply in Scenario One	Page 72
Table 18 :	Overview of the heat supply in Scenario One	Page 73
Table 19 :	Overview of fuel demand and production	Page 74
Table 20 :	Primary energy supply to Japan in 1999	Page 76
Table 21 :	Global hydrogen production and Japan's demand in Scenario One	Page 88
Table 22 :	Average wind speeds and solar radiation in Japan	Page 92
Table 23 :	Photovoltaic areas and their alignments	Page 96
Table 24 :	Wind turbine technical details	Page 97
Table 25 :	Renewable energy sources used in the <i>ERJ Scenario One</i> , their installed power, energy output and full load hours	Page 109
Table 26 :	Supply overview of the different „ <i>Energy Rich Japan</i> “ - <i>ERJ Scenarios</i>	Page 175
